Summary: Junior MERN stack Web Developer with 4 months internship experience able to build web applications from the ground up - information gathering, planning, design, development, problem solving and good maintenance. I am interested in being a Senior Full stack web Developer.

Skills

Experienced: HTML, CSS3, Bootstrap, Tailwind CSS, Material-UI, JavaScript, ReactJs, ChartJs, NodeJs, ExpressJs, MongoDb, Mongoose, Redux, Firebase, JWT, Stripe,
Familiar: React Native, TypeScript, Next.js.
Tools: VS Code, GitHub, Netlify, Heroku, Postman.

Work Experience

Mern Stack Developer (Internship)
DS Legends Pte. Lte. (Oct 2022 - Present)

- In DS Legends Pte. Lte. As a MERN stack developer, I build the E-commerce and NFT marketplace web applications.
- I've worked on front-end and back-end parts and I gather good knowledge about design and development. What I learned in this one month is equal to three months.
- As a quick learner, I'm working on different libraries and frameworks that I didn't know about before.

Projects

1. Tools app

Live Site Client site Server site

- It's a tool manufacturer website
- On this website you can order any tools and pay for the stripe method.
- Here have a client and an admin board to controle
- For admin role here i implement JWT token for verify

Tools: ReactJs, React router, Tailwind css, React Form, Firebase, Authentication, Node js, MongoDB, ExpressJS, Stripe js.

2.Fruites app

Live Site Client site Server site

- This is an wareHouse management website,
- On this website you can order any fruits and deleted order item
- Also implement firebase authentication,

Tools: React Js, React router, Tailwind css, React Form, Firebase Authentication, Node js, mongoDB, ExpressJs.

Education: BSS(degree) National university Bangladesh.
